

PRESS STATEMENT

TWENTY EIGHT COMPANIES PRE-QUALIFY FOR SIX MRT SYSTEM WORK PACKAGES

Overwhelming response with 51 submissions from local and international companies

Kuala Lumpur, 8 March 2012: Mass Rapid Transit Corporation Sdn Bhd (MRT Corp) has pre-qualified 28 companies for six MY Rapid Transit (MRT) system work packages. These companies were shortlisted from a total of 51 submissions.

The six work packages include electric trains, depot equipment and maintenance vehicles, signaling and train control system, platform screen doors, power supply and distribution system and track works.

The shortlisted companies are as follows:

“We are extremely pleased with the tremendous response that we have received from the companies who responded to our advertisements in October last year.

“All applications went through a rigorous evaluation process to ensure that the MRT project is delivered within the targeted time and cost. We assure that the tender process was done fairly and with full transparency,” Dato’ Azhar said.

Dato’ Azhar added, “I am also surprised that there were a few big and established companies which failed to pre-qualify because of the quality of their submissions.”

Applicants were evaluated based on their merits and a list of criteria, namely: financial capabilities, track record, experiences, existing management staff and key personnel, the average annual construction turnover in the last five years, their existing plant and equipment as well as their existing quality, safety, health and environment practices.

MRT Corp recently made public the full list of 90 work packages which range from advance works to multi-storey car park (Park and Ride Facilities). The full list of the work packages can be found on www.kvmrt.com.my.

The MRT project is Malaysia's largest public infrastructure project and is a key enabler to achieving the Greater KL goal and propelling Kuala Lumpur into the top 20 most liveable and economically vibrant cities in the world by 2020.
