

For a better community

MRT launches recycling campaign and colouring competition

MASS Rapid Transit Corporation (MRT Corp) Sdn Bhd has organised a colouring competition as part of its community campaign to instill creativity into young minds and to get closer with the community, particularly those living along the Sungai Buloh-Kajang line.

Fifty children aged between five and six from Taska Mama, Tadika Naluri Bestari, Tadika Cahaya Al-Taqwa as well as some children from the neighbourhood participated in the competition.

The children were required to colour a drawing featuring an MRT train. The first, second and third prize winners will each take home a mini trophy and Jusco vouchers worth RM100, RM50 and RM30 respectively. The rest of the participants will receive a mini trophy each.

In addition, MRT Corp will kick-start a month-long recycling campaign with Pertubuhan Amal Seri Sinar, an environmental non-governmental organisation, to encourage and reinforce recycling habits amongst the public.

During the campaign period, a recycling box will be placed in front of the MRT information centre in Kota Damansara to collect used clothes and toys from the community.

They came off with flying colours: Haris with the winners of the MRT Colouring Competition. (Front row, 3rd from left) Fithriya Alyaa Shafia Faidz Hirzan (2nd prize winner), Aimi Fatini Azhar Ahzam (1st prize winner) and Kamiliya Zainudin (3rd prize winner).

According to MRT Corp stakeholder relations and land director Haris Fadzilah, the competition and recycling campaign are part of MRT Corp's efforts to contribute to the betterment of the community and to increase knowledge and awareness of the MRT.

"Communities through which the MRT runs through will have another

way to be a part of saving the environment; that is by using the MRT to get to their destinations," said Haris.

"The MRT information centre serves as an activity hub for the community to meet and learn about the project's progress and provide them the opportunity to give their feedback on the MRT," said Haris.

"The MRT is environmentally friendly as it reduces carbon emissions resulting from private vehicle use.

"The recycling campaign exemplifies our commitment to motivate the public to conserve the environment and reduce waste in the easiest way possible," Haris added.
