

MRT Corp awards 2 more contracts

KUALA LUMPUR: Mass Rapid Transit Corp (MRT Corp) yesterday awarded two more viaduct tenders following the meeting of its One-Stop Procurement Committee (OSTC1) in Putrajaya.

In a statement yesterday, MRT Corp said the OSTC1 awarded Gading Engineering (M) Sdn Bhd the Package V2, which is for viaduct and associated works from the proposed Kota Damansara station to the proposed Dataran Sunway station. The contract is worth RM863.4 million.

Package V3 for viaduct and associated works from Dataran Sunway to Section 17 in Petaling Jaya was secured by Mudajaya Corp Bhd. This tender is valued at RM816.2 million.

Package V2, which is an open category, received bids from all 12 pre-qualified tenderers, while Package V3 received 11 bids.

According to MRT Corp, with these awards, there is only one final elevated civil works or viaduct package to be won, which is Package V8, for works between the proposed Taman Mesra station to the proposed Kajang station.

There are also eight station works packages to be awarded for the Sungai Buloh-Kajang line of the Klang Valley MRT project. Two are being evaluated and six are out on tender.

MRT Corp said a total of 26 companies are pre-qualified for the works, including 12 bumiputra companies. It expects to award all remaining tenders before year-end.
