

**First alignment:** The project aims at alleviating traffic congestion by increasing the number of passengers.

## MRT's first alignment project expected to provide service to 1.2 million passengers

MY Rapid Transit Mobile Information Truck is in town to create awareness of the project's first alignment – Sungai Buloh-Kajang to the public.

The truck will stop at commercial centres, neighbourhoods, shopping malls and higher learning institutions along the alignment to share information of the service.

It is equipped with three laptops and an interactive screen displaying a bird's eye view

of the alignment of the planned project.

Two MRT information officers will attend visitors' enquiries about the alignment.

The project is expected to provide train service to 1.2 million people with estimated daily ridership of more than 400,000 passengers.

MRT's objective is to alleviate traffic congestion by increasing the number of people using public transport in the near future.
