

Information hubs for Klang Valley MRT project launched

SERI KEMBANGAN: MRT Corp has launched several new information hubs for better public communication about the Klang Valley MRT Project.

MRT Sungai Buloh-Serdang-

Putrajaya (SSP) Line project director Datuk Amirudin Ma'aris said the hubs, dubbed touch points, would help the company engage the public better.

Amirudin said the touch points

included two information centres, information kiosks, and a mobile information truck.

"We would like to know from the public about the MRT, but we would like to be heard as well," he

said at the Seri Kembangan MRT Info centre's launch.

The other info centre for the MRT SSP Line is at Viva Residency in Jalan Sultan Azlan Shah, Kuala Lumpur.

Meanwhile, Amirudin said the information kiosks are roadshow booths that will be placed in locations near MRT lines with high pedestrian traffic, such as shopping malls. - by **Lee Choon Fai**
