**S**UNWAY Construction Group Bhd has bagged a viaduct contract worth RM1.21 billion from Mass Rapid Transit Corp Sdn Bhd (MRT Corp) for the construction of the MRT Sungai Buloh-Serdang-Putrajaya (SSP) Line.

MRT Corp chief executive officer Datuk Seri Shahril Mokhtar said the contract was the second viaduct work package for the SSP Line after work package V202 worth RM1.44 billion was awarded to Ahmad Zaki Resources Bhd last week.

“Both contractors will soon clear their sites and mobilise machinery to begin construction work. I am confident we will be able to follow closely to the schedule to ensure that Phase 1 of the SSP Line begins operations in the second quarter of 2021,” said

**Datuk Seri Shahril Mokhtar**

Shahril in a statement yesterday, adding that the rest of the SSP Line would be operational in the second quarter of 2022.

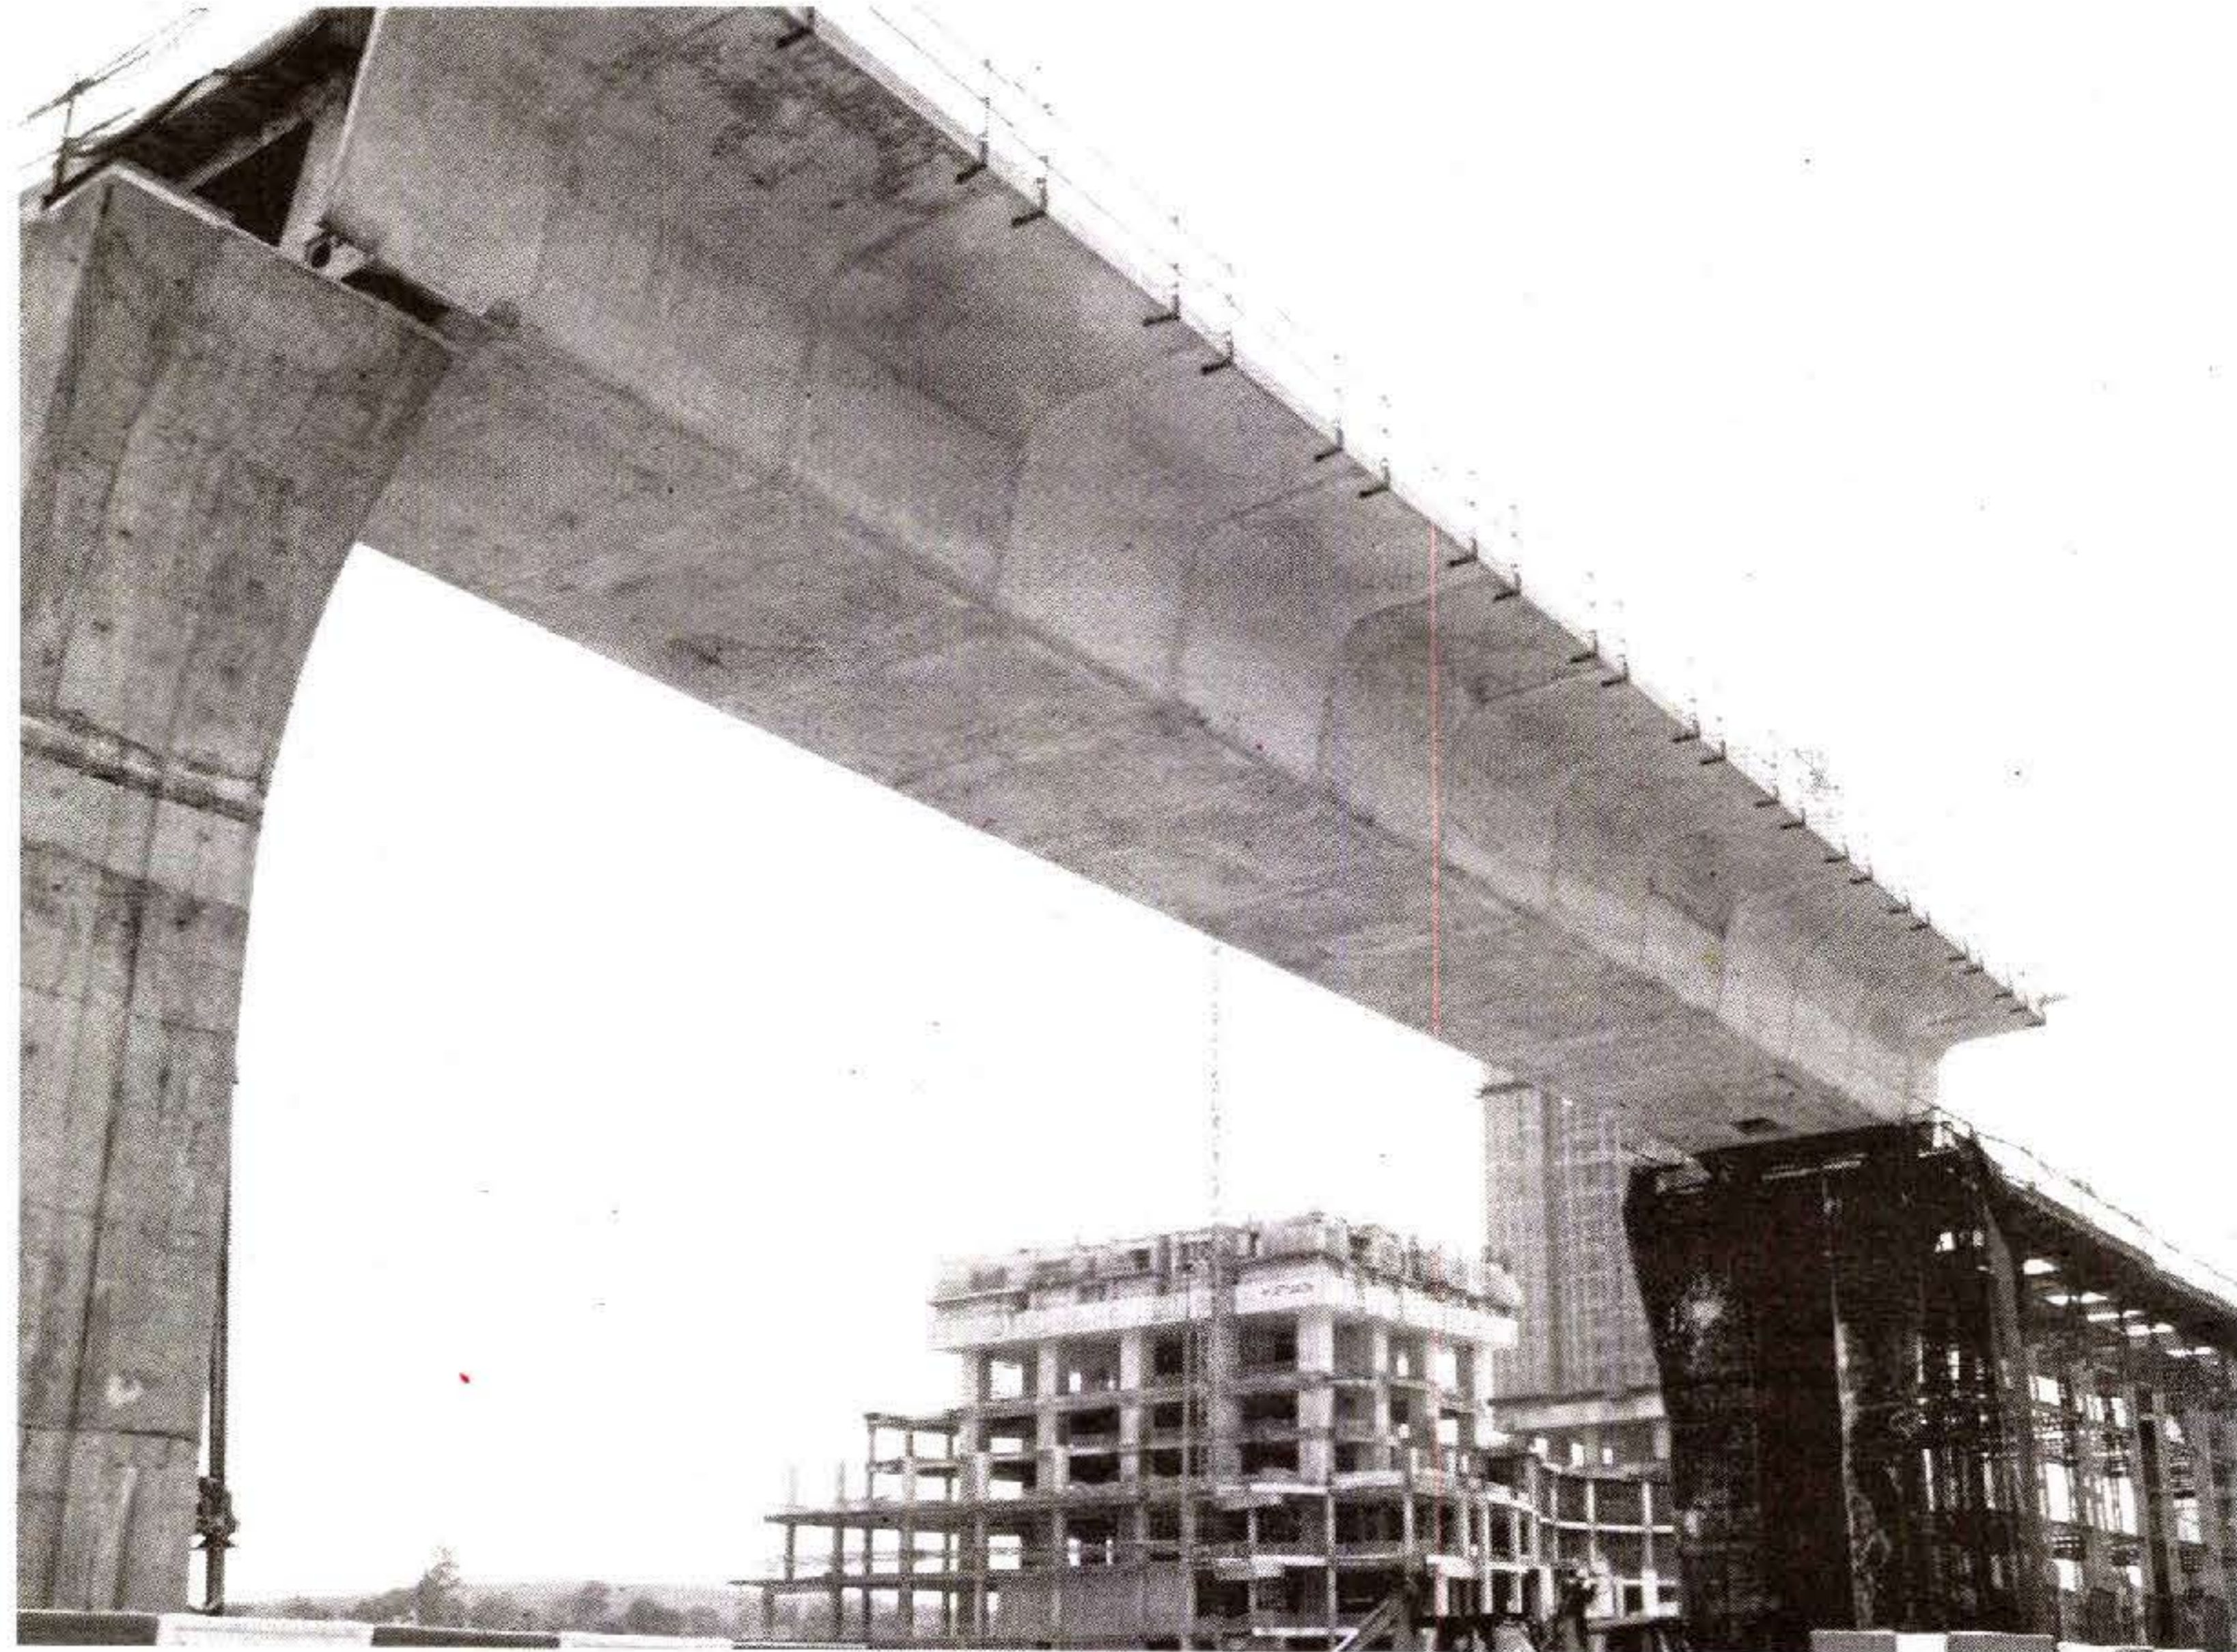

Sunway Construction is also the contractor for Package V4 of the MRT Sungai Buloh-Kajang Line.

Shahril said successful bidders were evaluated on technical and commercial aspects, which meant that the successful tender might not always be the one with the lowest price.

The 52.2km SSP Line will have 37 stations, 11 of them underground.

There are a total of 66 work packages for the construction of the SSP Line, which include 10 viaduct guideway packages, one underground works package, two depot work packages and 10 station work packages.

Others are a 15 multi-storey park-and-ride work package, advance works, connectivity, systems, designated suppliers and designated contractors.
